

## VACANCY ANNOUNCEMENT

**Position: iPhone Application Developers**

**Opening Date: December 19,2010**

**Closing Date: December 25, 2010**

**Employment: Full-time**

Approbatics is a US based software engineering company specializing in iPhone/iPad, Rich Internet Application and Google Application development. Our customers include EBay, National Geographic, How True, Capturator, International Harvester/Navistar, and Quiznos. The Company had a small off shore software development group in Ethiopia since 2006.

Currently we are looking for four iPhone/iPad developers to work on US based projects. We are looking for highly motivated, self-starters, and quick learners to fill these positions.

The prospective candidates will work on iPhone/iPad applications in cooperation with a US based project management and software engineering team. We are looking for candidates with experience in object oriented programming, solid background in software engineering principles, software development life cycle, and C/C++ programming language. Familiarity with Mac OS, Xcode, objective C and a mobile platform is highly desirable. The prospective candidate will be working as a member of software development teams in the United States. Thus proficiency in English and excellent communications skill is required.

*Qualified candidates will be given a month of intensive training in iPhone/iPad application development.*

### **Academic qualification**

The prospective candidate should have at least a BSC in computer science, computer engineering or related discipline from a recognized university.

Short-listed candidates will be required to take aptitude test to assess the level of their analytical, and problem solving skills and English proficiency. The candidate will also sit for final face to face interview with the local Approbatics team and for a phone interview with the US based software engineering team.

If you are interested to work in an exciting leading edge software technology area with very bright and motivated engineers employing best software practices. If you are motivated, self-starter and a quick learner, then send your resume to [jobs@approbatics.com](mailto:jobs@approbatics.com).
